Bridging technology and supply chain expertise.

At Clearchain, we bring together two worlds that rarely intersect. Deep insight into supply chain risk management and practical expertise in modern software development enable us to create a unique solution that companies have been seeking. We understand the challenges businesses face. That's why we've built Clearchain to address them with smart, simple, and scalable tools. With our solution, you're not just keeping up — you're building a resilient supply chain ready for whatever comes next.

Our solution for the supply chain pain points.

Compliance management

Are you still tracking compliance manually, chasing updates and deadlines across teams?

Clearchain automates your compliance processes, so you're always prepared for audits without the last-minute scramble.

Risk assessment

Do supply chain risks often catch your team off guard?

Clearchain detects early warning signs through AI-driven data insights, so you can act before small issues turn into big problems.

Suppliers traceability

Are you having trouble tracking the origins and history of your suppliers?

Clearchain gives you end-to-end visibility into your supply chain—no gaps, no guesswork.

Documents and certification

Are your critical documents and certifications buried in emails or lost in outdated folders?

Clearchain brings everything together in one place, so you always know where to find the latest approved version.

Built to make supplier management easier for everyone.

Visualize your entire supply chain instantly.

See your full supply chain come to life. Just upload your supplier data, and Clearchain maps every connection to trace products end-to-end.

Transform static PDFs into actionable data.

No more digging through files. Clearchain reads and organizes your documents, spots expiring certificates, and sends you reminders before they become a problem.

AI-driven supplier risk assessments.

Understand your risks in seconds. Clearchain analyzes your suppliers' data and documents to highlight weak spots, score performance, and keep your compliance on track.

Evaluate and mitigate risk.

Clearchain analyzes your suppliers' data and documentation to identify vulnerabilities, assess risks, and evaluate performance across key ESG parameters.

clearchain

Map your supply chain.

Risk assess your suppliers in seconds.

Automate your certification management.

Compliance easier than ever before!

Create and version policies for suppliers and teams.

Easily create, update, and share policies with full version history to keep teams and suppliers aligned on requirements.

Automatically collect and manage documentation from suppliers.

Collect and manage required documentation automatically with built-in renewal and approval workflows.

Monitor compliance with segmented oversight.

Group suppliers and departments into segments to streamline compliance monitoring and management.

Benefits? More than you can imagine.

Up to 50%[1] manual workload reduction.

Work that previously required two or three people – like updating spreadsheets and archiving documents – can now be handled by one, without added stress.

Cut 90%[1] of communication efforts on requesting documentation.

Teams handling hundreds of certificates or documents per month now complete tasks in minutes thanks to automation.

Upgrade from Excel. Unlock Control.

Manual updates	→	Live status tracking & auto-reminders
Scattered files & versions	→	Centralised data & documents
Hard to collaborate	→	Role-based access, comments, tasks
No compliance logic	→	Built-in risk and compliance workflows
Flat tables, no context	→	Visual dashboards, risk heatmaps

Simple subscription plan. Always a free trial!

Enterprise
